

TITANFORGE

GAMING

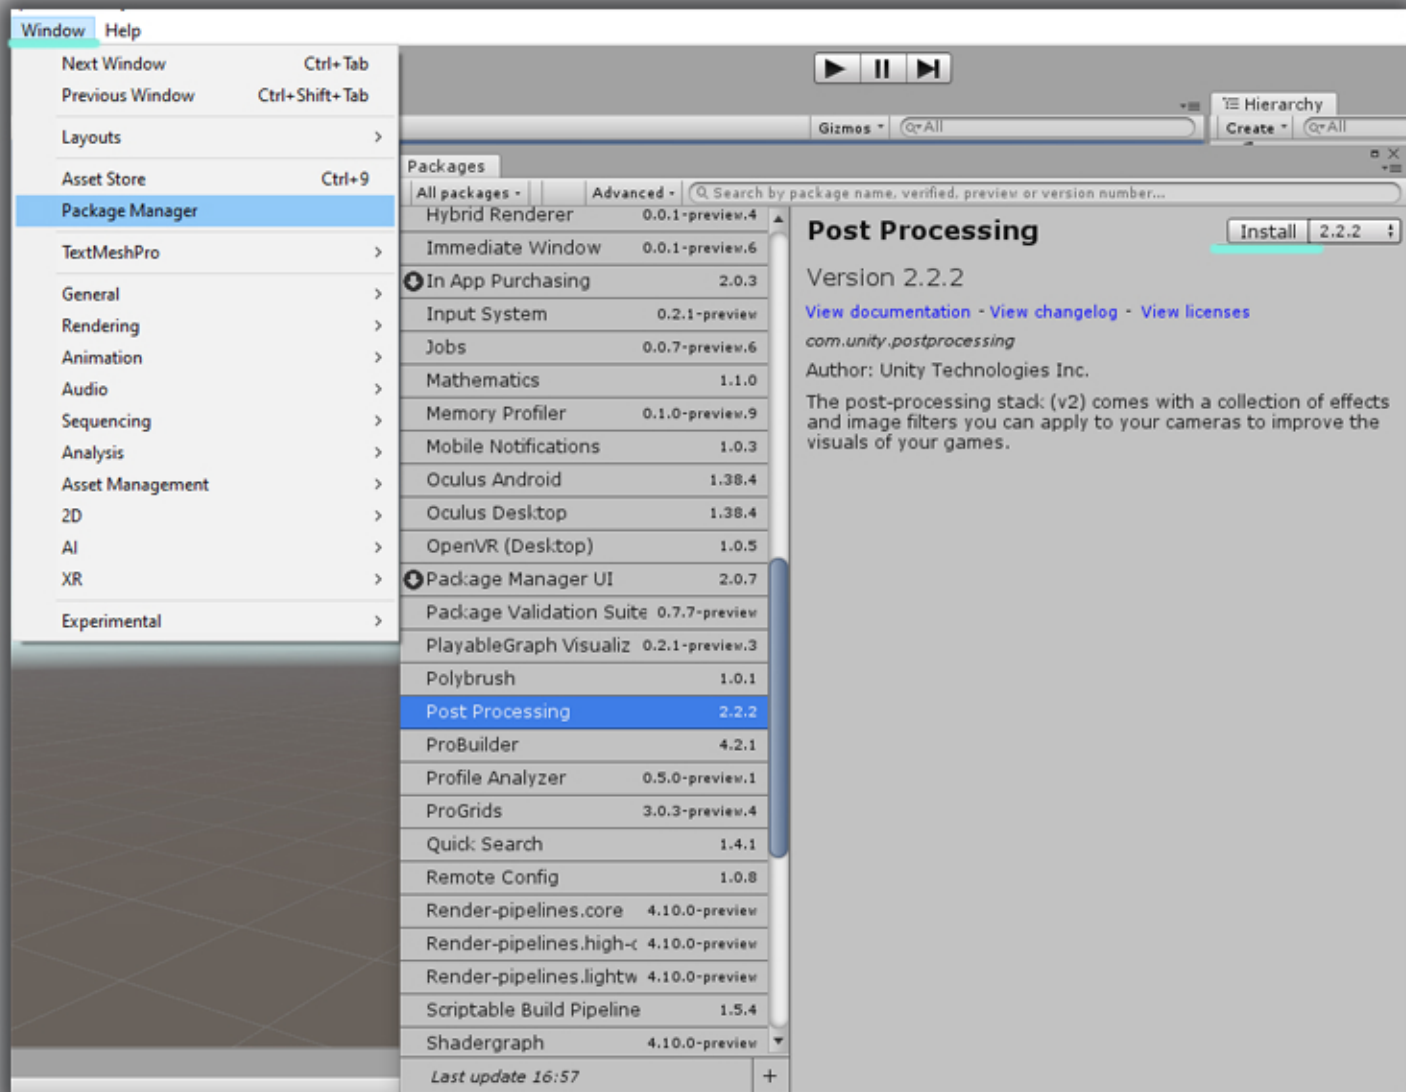

Thank you for purchasing this TitanForge asset!

For the best looking results, please set Color Space to Linear instead of Gamma and install the Post Processing package in the Package Manager. See below for visual aids.

Click Edit then Project Settings.
Choose Player and change Color Space to Linear.

After that click Window then Package Manager. Make certain that you have all Packages Enabled and search for Post Processing Package. Install Post Processing.

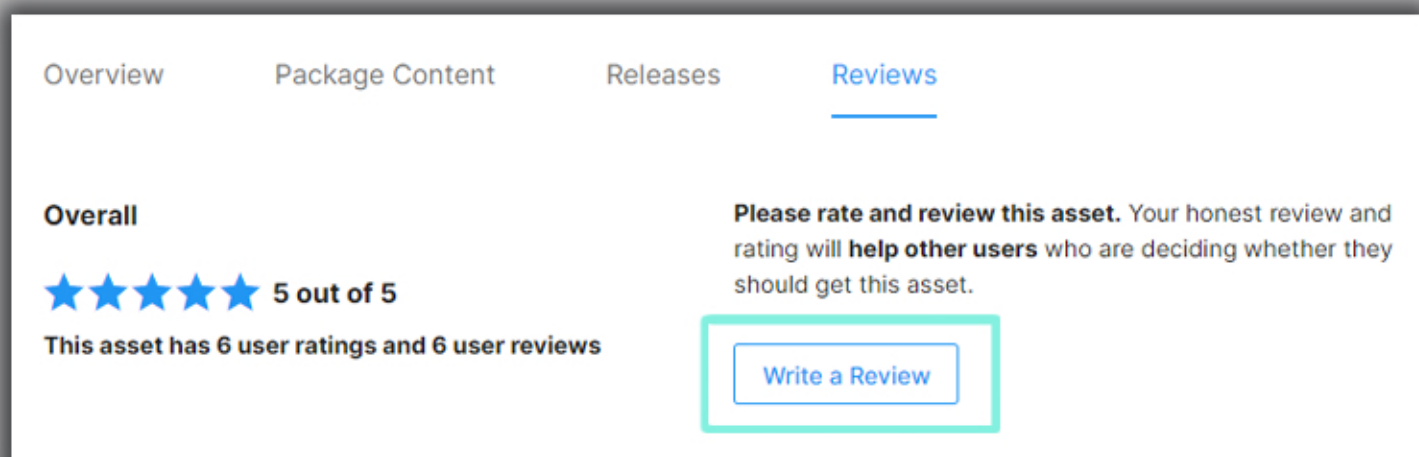

Universal Render Pipeline Options

Make sure you are using URP in your project. Locate the URP version package in the packages folder. Double click and import the files. Your projects materials should now be updated.

Then you should be ready to enjoy your new package!

Please leave a positive review in the Unity Asset store to help TitanForge develop more assets and for TitanForge assets to be included in more Unity Sales!

Thank you again and please let me know if you have any issues or suggestions.
